

THAJAS M

Bengaluru, Karnataka · +91 9600462407 · thejasmugunthan@gmail.com · [linkedin](#) · [Portfolio](#)

SUMMARY

I'm a Software Engineer focused on backend and full-stack development, specializing in API design, database architecture, cloud deployments, and scalable system design. Experienced with ASP.NET Core, Node.js, AWS, SAP HANA, PostgreSQL, and modern frontend frameworks including React, Next.js, and Angular. Also worked on ML-based solutions for marketing use cases and currently exploring LLM and agentic AI integrations in production-oriented applications.

TECHNICAL SKILLS

Backend: Node.js, Express.js, Python, ASP.NET Core (C#), REST API design, Microservices

Frontend: React.js, Next.js, Angular, TypeScript, JavaScript (ES8+), component-based UI

Databases: PostgreSQL, MySQL, MongoDB, SAP HANA — schema design, stored procedures, indexing, migrations

Cloud & DevOps: AWS (EC2, RDS, S3, Elastic Beanstalk), GitHub Actions CI/CD, Docker, Postman

Auth & Security: JWT, refresh token rotation, bcrypt, Role-Based Access Control (RBAC)

AI / Data: LLM API integration (OpenAI/Anthropic), LangChain (learning), agentic workflow design

Practices: Agile/Scrum, MVC, OOP, code review, API testing, technical documentation

EXPERIENCE

Software Engineer Intern — *Techative Solutions Pvt. Ltd.*

Feb 2026 – Present

- Built and maintained full-stack applications using React.js and Next.js frontends with ASP.NET Web API and Express.js backends for dashboards, transactional systems, and engineering workflows.
- Developed and maintained REST APIs using ASP.NET Core and Express.js following a microservices-based architecture.
- Optimized PostgreSQL and SAP HANA queries by implementing stored procedures, indexing strategies, and database migrations for improved performance and reliability.
- Managed deployments on IIS and AWS (EC2, RDS, S3, Elastic Beanstalk) and implemented CI/CD pipelines using GitHub Actions.
- Trained and Deployed Python-based ML models as microservices with REST APIs integrated into React dashboards for marketing and data-driven workflows.

PROJECTS

AgriRent – Equipment Rental Platform | *React.js · Node.js · MongoDB Atlas · LightGBM · AWS* | [Github](#)

- Built a full-stack equipment rental platform for farmers and equipment owners with separate user workflows using React.js, Node.js, and MongoDB Atlas.
- Developed and deployed scalable backend services on AWS with CI/CD pipelines, and integrated a Python-based LightGBM microservice for dynamic pricing recommendations.
- Implemented secure authentication and authorization using JWT, refresh token rotation, bcrypt hashing, and role-based access control.

InternLink – Internship Management System | *Angular · TypeScript · Node.js · Express.js · MySQL* | [Github](#)

- Built a multi-role internship management platform for students, recruiters, and admins using Angular, Node.js, Express.js, and MySQL with role-based workflows and lazy-loaded modules.
- Developed REST APIs with features including resume uploads, email verification, pagination, and a normalized MySQL database schema for managing users, applications, and job listings.
- Built this application using a locally hosted agentic AI model with Ollama and OpenAI APIs for intelligent recruitment automation and resume analysis.

CERTIFICATIONS

- AWS Cloud Essentials – Amazon Web Services
- Google Cloud Fundamentals & Generative AI Concepts – Google
- Software Engineering & Agile Development – Infosys Springboard
- Problem Solving & Programming (SQL, Python, Java, C++) – HackerRank

EDUCATION

Master of Computer Applications (MCA) PES University, Bengaluru CGPA: 7.5	Aug 2024 – May 2026
Bachelor of Computer Applications (BCA) Sri Ramakrishna College of Arts & Science, Coimbatore CGPA: 7.4	Jun 2021 – Apr 2024

LANGUAGES

English · Kannada · Tamil (Native)
